Introducing PRP Hair Restoration

*Take back your
confidence in 2020*

AUTOLOGOUS
PLATELET-RICH
PLASMA, ALSO
KNOWN AS PRP, IS
A HIGH
CONCENTRATION
OF YOUR OWN
PLATELETS | A
SMALL VOLUME OF
PLASMA.

What is PRP Therapy? PRP hair restoration is a non-invasive, all-natural procedure that has been found to stimulate hair regrowth as well as reduce the effects of thinning.

New year. More hair.

PRP therapy for hair regrowth works on the basis on utilizing growth factors that exist in normal platelets. These growth factors enter the hair bulb circulation and stimulate the stem cells. This promotes positive changes in the follicle, supporting new hair growth. Call today for your free consultation!
